

Progression Steps Explained

Progression Steps are a continuum of learning from ages 3 to 16, with reference points at ages 5, 8, 11, 14, and 16. The Progression Steps are a series of achievement outcomes that are broad expectations of learning over two to three-year periods. Progression is not a linear process, but a road map for each individual child. The Progression Steps will help learners, teachers, parents, and carers understand if appropriate progress is being made.
